PROFESSIONAL SUMMARY

Motivated Java Developer with a strong foundation in Core Java, Object-Oriented Programming, Collections, Exception Handling, JDBC, SQL, MySQL, Servlets, and JSP. Experienced in developing database-driven applications and implementing CRUD operations using Java and JDBC, with strong problem-solving and debugging skills.

Analytical and detail-oriented Data Science professional with knowledge of Python, Pandas, NumPy, Data Analysis, Data Preprocessing, Exploratory Data Analysis, Machine Learning, and Data Visualization. Skilled in analyzing datasets, identifying patterns, and generating meaningful insights using data-driven approaches.

WORK EXPERIENCE

Jun 2026 - Present

Associate Software Engineer

Prominent Scientific PVT LTD, Hyderabad

- Worked with Java, Core Java, OOP concepts, Collections, Exception Handling, JDBC, Servlets, and JSP in application development.
- Developed and maintained SQL and MySQL database-driven applications for storing, retrieving, and managing data.
- Implemented CRUD operations and established database connectivity using JDBC.
- Participated in understanding requirements, troubleshooting issues, and developing maintainable application code.
- Involved in application development, testing, debugging, and performance improvement activities.

Feb 2023 - Nov 2023

Data Science Intern

DataMites, Hyderabad

- Collected, cleaned, preprocessed, and analyzed datasets using Python, Pandas, and NumPy.
- Performed Exploratory Data Analysis to identify patterns, trends, and relationships within datasets.
- Built and evaluated Machine Learning models for predictive analytics and data-driven solutions.
- Created data visualizations to communicate analytical findings and insights.
- Applied statistical and machine learning techniques to solve data analysis problems.

EDUCATION

Jun 2016 - Sep 2020

Bachelor of Technology

NBKR Institute of Science and Technology, Vidhyanagar, SPSR Nellore

- B.Tech in Electronics and Communication Engineering.
- Studied electronics, communication, programming, and engineering concepts.
- Gained knowledge of digital electronics, analog electronics, microprocessors, communication systems, and signal processing.
- Developed programming, analytical, and problem-solving skills.

PROJECTS

Jun 2023 - Sep 2023

Flight Price Prediction

- Developed a Machine Learning model to predict flight ticket prices based on different flight-related features.
- Performed data cleaning, preprocessing, encoding, feature engineering, and Exploratory Data Analysis.
- Implemented Linear Regression, Decision Tree, Random Forest, and Gradient Boosting regression models.
- Evaluated model performance using MAE, MSE, RMSE, and R^2 metrics.
- Used Random Forest to capture nonlinear relationships between flight features and ticket prices.
- Created visualizations using Matplotlib and Seaborn to analyze data patterns and model results.

Jun 2023 - Sep 2023

Heart Disease Prediction

- Developed a Machine Learning-based system for predicting the likelihood of heart disease.
- Performed data cleaning, preprocessing, Exploratory Data Analysis, feature selection, and data visualization.
- Implemented Logistic Regression, Decision Tree, Random Forest, and K-Nearest Neighbors algorithms.
- Evaluated models using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.
- Compared different models to identify suitable predictive performance based on evaluation metrics.

TECHNICAL SKILLS

Java: Skillful | **Data Science:** Skillful | **Python:** Skillful | **Power BI:** Skillful | **Machine Learning:** Skillful

LANGUAGES

- **English** - Working Knowledge
- **Telugu** - Native Speaker

HOBBIES

- Learning new technologies
- Reading and self-learning
- Listening to music
- Solving logical and programming problems
